EDUCATION

2023 - Present	PhD. in COMPUTER VISION Mohamed bin Zayed University of Artificial Intelligence (MBZUAI) GPA: 3.90/4.0 , <i>First Class Honours</i> .
2021 - 2022	Master of Science in COMPUTER VISION Mohamed bin Zayed University of Artificial Intelligence (MBZUAI) Thesis: "Adversarial Pixel Restoration as a Pretext Task for Transferable Perturbations." GPA: 4.0/4.0 , <i>First Class Honours</i> .
2014 - 2018	Bachelor of Technology in ELECTRONICS AND COMMUNICATION ENGINEERING National Institute of Technology, Srinagar (NIT) Thesis: "Channel Estimation for Wireless Communication systems, using least-square method." GPA: 8.48/10.0 , <i>First Class Honours</i> .

WORK EXPERIENCE

Jan.2021 - Present	Graduate Research Assistant Intelligent Visual Analytics Lab (IVAL), MBZUAI, Abu Dhabi, UAE Working on evaluating robustness of uni-modal and multi-modal vision-based models.
Aug.2025 - Dec.2025	Research Intern Robust Intelligent Systems, Khalifa University, Abu Dhabi, UAE Conducted a systematic study on multilingual adversarial robustness and multimodal safety of MLLMs, analyzing cross-lingual transferability of gradient-based attacks and multilingual safety failures under textual and visual jailbreak scenarios.
Mar.2019 - Jun.2019	Research Intern Robotics Research Center - IIIT Hyderabad, India Worked on Motion segmentation and estimating depth from multiple views for autonomous navigation of cars using deep network based framework.
Jul.2018 - Mar.2019	Computer Vision Engineer Cingularity TEC India Pvt. Ltd., Bangalore, India Built Computer Vision Systems involving License Plate Recognition, Vehicle Recognition and Counting vehicles in malls and parking lots.
Jul.2018 - Mar. 2019	Project Assistant Computational Intelligence Lab- IISc, India Developing frameworks using deep convolutional neural networks for classification/detection of diseases in Sugarcane. Implementing models to detect different type of damages in vehicles.

RESEARCH INTERESTS

Intrigued by the vulnerability of deep neural networks, my research focuses on the Safety and Reliability of AI, with a particular emphasis on understanding, evaluating, and enhancing the robustness of vision-based models.

- Exploring Adversarial Robustness and Safety Alignment in Multilingual Multi-Modal Large Language Models (*Under Review*). [\[Paper\]](#)
- Beyond False Stability: High-Noise Drift Gating for Test-Time Adversarial Defenses in Vision-Language Models (*Under Review*). [\[Paper\]](#)
- CORTEX: A Structured Reasoning Benchmark for Trustworthy 3D Chest CT MLLMs. Accepted at SAFER Workshop: Stable Adaptation and Faithful Evaluation of Reasoning in Medical Foundation Models (**MICCAI 2026**). [\[Paper\]](#)
- How Good is my Histopathology Vision-Language Foundation Model? A Holistic Benchmark. Accepted at 30th Conference on Medical Image Understanding and Analysis (**MIUA 2026**). [\[Paper\]](#)
- FACEGUARDIAN: Protecting Facial Biometrics from Malicious Generative Editing via Latent Optimization. Accepted at 4th IEEE Conference on Secure and Trustworthy Machine Learning (**SaTML 2026**).
- Robust-LLaVA: On the Effectiveness of Large-Scale Robust Image Encoders for Multi-modal Large Language Models. Accepted in Workshop of Trustworthy Foundation Models Workshop at **ICCV 2025**. [\[Paper\]](#)
- Hierarchical Self-Supervised Adversarial Training for Robust Vision Models in Histopathology. Accepted at International Conference on Medical Image Computing and Computer Assisted Intervention (**MICCAI 2025**). [\[Paper\]](#)
- Towards Evaluating the Robustness of Visual State Space Models. Accepted in Workshop of Adversarial Machine Learning on Computer Vision: Foundation Models + X at **CVPR 2025**. [\[Paper\]](#)
- ObjectCompose: Evaluating Resilience of Vision-Based Models on Object-to-Background Compositional Changes. Accepted at Asian Conference on Computer Vision (**ACCV 2024-Oral**). [\[Paper\]](#)
- On Evaluating Adversarial Robustness of Volumetric Medical Segmentation Models. Accepted at The British Machine Vision Conference (**BMVC 2024**). [\[Paper\]](#)
- Adversarial Pixel Restoration as a Pretext Task for Transferable Perturbations. Accepted at The British Machine Vision Conference (**BMVC 2022-Oral**). [\[Paper\]](#)

ACADEMIC SERVICE

REVIEWER ECCV, BMVC, WACV, CVPR, MICCAI

HONORS AND AWARDS

- DEC. 2024 Secured Best Student Paper Honorable Mention Award at ACCV 2024.
- JAN. 2023 **PhD** Awarded Research Scholarship by Mohamed bin Zayed University of Artificial Intelligence (MBZUAI) for the period of four years.
- JAN. 2021 **MSc.** Awarded Postgraduate Research Scholarship by Mohamed bin Zayed University of Artificial Intelligence (MBZUAI) for the period of two years.
- JUN. 2018 Qualified National Level Graduate Aptitude Test in Engineering(GATE).
- JUN. 2018 Among top 15 percentile of the class of Bachelors in Electronics and Communication.
- JUN. 2014 Qualified National Level Joint Engineering Entrance(JEE) for admission into NITs.
- JUN. 2013 15th Position in the State Level Board Exam of grade XII.

COMPUTATIONAL SKILLS

- PYTHON** EXPERT KNOWLEDGE- I am extensively using python to build novel machine learning algorithms for the last few years.
- PYTORCH** Pytorch is usually my default choice due to its dynamic nature and object-oriented graph design approach.
- KERAS** I have used Keras with Tensorflow before and have gained decent familiarity with it.
- MATLAB** Most of my Bachelor projects have been done using Matlab.
- C** I scored A grades in the language in my B.Tech course.
